List of changes

This document lists the changes made to the book **OpenBookRadio**, from the most recent to the oldest: the **date**, the **version**, the **user** (nickname) of the person who made the change, and what changed. It accompanies the book as a separate file. Anyone who modifies the book adds one line at the top of this list with their nickname. This list is kept in English only.

Date	Version	User	Change
02/11/2026	V4.0 beta	ic3ric4	Beta of version 4 (stable V4 planned for the release of firmware Fusion v7). The list of changes leaves the book and becomes this separate English file. New: credits page before the back cover; sheet A35 “CW paddle to build” (USB-C wiring for the CW USB app, five models including an audio interface for the microphone jack that does not need the app); annex A3 and sheet A36 “UV-K10 Pro” (first draft from a reseller page, to be completed when the radio is out); world map of reference stations (time signals, VOLMET, radiofax, weather satellites, radiosonde launch sites) under the wave spectrum on page 10; UV-K5 V3 added next to UV-K1 in titles and key texts. Overlay applications: missing screens replaced with those of UV Studio, keys of Broadcast FM, new sheet A18b for the five community apps (BandScan, CBSkaner, InvAudio, Temp 433, WRCX212 CB-40), names corrected. Page layout: top tabs reduced to thin strips with a larger tab showing only the chapter number; the nickname is removed from the page footer.
02/11/2026	V3.9	ic3ric4	Original creators credited in the page footer, right-aligned in light grey (F4HWN, muzkr, Robby69400, Gogu-Qs, NR7Y and the authors of the tools mentioned); “(F4HWN)” added to the titles of Labs (A09) and Multiboot (A02) and to the contents.
02/11/2026	V3.8	ic3ric4	Overlay applications: sheet A14 is now an alphabetical list (icon, name, function), sheets A15 to A18 are alphabetical cards (real screen, keys, description, green outline for receive-only and red for applications that can transmit); Cube3D and Plasma removed; cross-references and index updated (one entry per application).
02/11/2026	V3.7	ic3ric4	New content: VOR (sheet 12, now “ILS and VOR”), radiosonde modulation and launch sites (sheet 15), JS8Call, WSPR, Winlink and VARA (sheet 23), LoRa APRS and 9600-baud APRS (sheet 26), recognising your hardware (sheet 3), recovery in DFU mode (A03), portable Yagi, QFH and discone (A19), ADRASEC and CRR (A00a), ANTARES to RRF (sheet 21), SGB beacons (sheet 22), BeiDou and EGNOS (sheet 20), SFI, K index and grey line (sheet 1), index put back in alphabetical order.
02/11/2026	V3.6	ic3ric4	Version line removed from page 3; version number (0.1 higher at each change) shown in the footer of every page and in the file name.
01/11/2026	V3.5	ic3ric4	Full proofreading: technical and cross-reference corrections (DSC, ADS-B, weather satellites, CB, 70 cm repeaters, 18650 battery, ESP32…), versions checked (F4HWN 6.3.0, GOGUFW 3.3.5, Sonic V73, Apex 1.4, ATS Mini 2.45, UV Studio 2.3.0), F4HWN DTMF menus in sheet 35, spectrum chart in sheet 1, overlay application logos (A14 to A18) and missing catalogue applications.
01/11/2026	V3.4	ic3ric4	3 mm colour strip on the right edge of every sheet and a triangle with the sheet number at the bottom right; new chapter 9 “Go further” with sheet 35 (CTCSS, DCS and DTMF, diagram of three radios); 71 sheets.
01/11/2026	V3.3	ic3ric4	Added the IARU regions map (before sheet 6) and the amateur and broadcast bands of regions 2 and 3 (after sheet 7).
01/11/2026	V3.2	ic3ric4	First English edition (EN): texts, diagrams, images and covers translated.
01/11/2026	V3.1	ic3ric4	Added this list of changes before the last page. New file-name rule: language, version, month and year (example: FROpenBookRadio-V3.6-1126.PDF).
31/10/2026	V3.0	ic3ric4	Starting point of the list: version V3 beta, 70 sheets (chapters 1 to 8, annexes A00, A1 and A2, from A00a to A34).

File names

The book file is always named **(Lg)OpenBookRadio-(Version)-MMYY.PDF**, whoever modifies it:

- **(Lg)**: the two letters of the book's language (FR for French, EN, ES, DE…).
- **(Version)**: the version number, increased by 0.1 at each change (V3.9, V4.0 beta, V4.1…).
- **MMYY**: the month and the two-digit year of the change (November 2026: 1126).
- Example for this version: **FROpenBookRadio-V4.0beta-1126.PDF**.

This list itself is always named **EN-listofchange-OBradio.pdf**.
